**Abrosimov, A.Yu.**  
Morphological diagnostics of thyroid diseases / A.Yu. Abrosimov, I.A. Kasantseva, E.F. Lushnikov. — Moscow: « », 2019. — 240 p.: ill. — ISBN 978-5-91894-081-5

The International Agency for Research of Cancer (IARC) published the new 4th Edition of WHO Classification of Tumors of Endocrine Organs by in 2017. As the previous 2004 edition, the new classification gives considerable attention to thyroid neoplasms. The nomenclature of thyroid tumors undergone changes based on the clinical, morphological and molecular genetic findings obtained for the expired period, on respective new views of their malignant potential, and on the prognosis of a number of neoplasms that should be taken into consideration by pathologists in their daily diagnostic practice. The second revised and completed edition of color Atlas of thyroid pathology includes criteria of cytological diagnostics in accordance with the Bethesda system, as well as criteria of new histological categories in accordance with the 2017 WHO Classification of thyroid tumors.
