The figure consists of two dot plots side-by-side. The left plot shows a distribution of scores from 221 to 251. The right plot shows a distribution of scores from 356 to 391. In both plots, the frequency of each score is indicated by the number of dots above it.

Score	Frequency (Left Plot)	Frequency (Right Plot)
221	1	0

4

Scatter plot showing the relationship between the number of species (S) and the number of genera (G) for various plant families. The x-axis is labeled 'S' and the y-axis is labeled 'G'. Both axes range from 0 to 500. The plot shows a strong positive correlation, with many points falling along the diagonal line where S equals G. Points are labeled with family names and numbers.
